

BLOOD CANCERS:

STATISTICS, SYMPTOMS, AND TREATMENTS

BLOOD CANCER STATISTICS*

- Approximately every 3 minutes, one person in the United States is diagnosed with a blood cancer
- Over **184,000** people are expected to be diagnosed with lymphoma, leukemia, or multiple myeloma
- Nearly **1.4 million** people in the United States are either living with, or are in remission from, leukemia, lymphoma, or myeloma

KNOW THE SIGNS AND SYMPTOMS

Blood cancers share many of the same signs and symptoms. If you're not feeling like your normal self, make an appointment to see your healthcare professional.

Signs and symptoms may include but are not limited to:

Swelling of lymph nodes

Fatigue

Unexplained weight loss

Repeated infections

Bleeding or bruising easily

Bone or joint pain

TYPES OF TREATMENT FOR BLOOD CANCERS

Treatment for any cancer depends on the type of cancer and the stage.

For blood cancers, treatment options may include:

Chemotherapy

Radiation

Targeted therapy

Immunotherapy

Steroids

Stem cell transplant
